

Abdelkrim Zouaki

Montreal, QC | +1 (438) 506-2577 | abdelkrim.zouaki.ti@gmail.com | linkedin.com/in/abdelkrim-z-9a3782229 | karim871.github.io/Portfolio

PROFILE

Bilingual (FR/EN) IT Security Specialist with hands-on operational experience in threat detection, incident response, and network defense. Certified CCNA, Security+, and CySA+. Built and operated a home SOC running Suricata IDS/IPS, Splunk, Wazuh HIDS, and pfSense with multi-VLAN architecture and OpenVPN. Documented a full incident response — PowerShell fileless attack (MITRE T1059.001) — detected and contained in **42 minutes**. Professional experience handling 25–35 incidents/day under SLA in bilingual environment. Daily Linux user (Arch).

CERTIFICATIONS

- ✓ CompTIA CySA+ (2025–2028)
- ✓ Cisco CCNA – Enterprise Networking, Security & Automation
- ✓ CompTIA Security+ (2025–2028)
- ✓ Microsoft AZ-900 & SC-900

PROFESSIONAL EXPERIENCE

IT Support Technician

July 2025 – November 2025

Alorica · Montreal, QC

- Resolved 25–35 technical incidents per day in a high-volume, bilingual (FR/EN) environment
- Troubleshoot Windows 10/11, Office 365, VPN connectivity, and network peripherals
- Documented incidents in CRM with structured escalation to L2/L3 security and infrastructure teams
- Operated under strict SLA pressure with rapid adaptation to client-specific tooling and procedures

IT Support Intern

January 2025 – April 2025

Groupe Cosior · Montreal, QC

- Assisted in installation, configuration, and maintenance of servers and network equipment
- Supported the cybersecurity team in traffic monitoring and vulnerability surveillance
- Documented configurations and incident records for internal knowledge base

HANDS-ON SECURITY PROJECTS

Home SOC Lab – Threat Detection & Incident Response | [Suricata](#) · [Splunk](#) · [Wazuh](#) · [ELK](#) · [Sysmon](#)

- Deployed Suricata IDS/IPS with custom rules (ET Pro/ET Open) for real-time network threat detection
- Collected and analyzed logs via Splunk — HTTP, DNS, SSH, and firewall traffic
- Deployed Sysmon + Wazuh HIDS in Windows VM for MITRE ATT&CK event detection and correlation
- Built dashboards: DNS threat maps, network anomalies, SSH brute force attempts
- Conducted simulated attacks (nmap, Hydra) with full IR cycle: triage → timeline → containment
- **Key result:** Detected and contained PowerShell fileless attack (T1059.001) in **42 minutes**
- Tuned Suricata rules to reduce false positives and improve network scan detection coverage

pfSense Firewall – Secure Network Architecture

- Deployed LAN/WAN, VLAN segmentation, inter-VLAN routing, site-to-site VPN + OpenVPN client access
- Implemented advanced filtering policies, NAT, DHCP, DNS Resolver; integrated Suricata inline mode

CyberOps Sidekick – Threat Intelligence Bot | [Python](#) · [n8n](#) · [AbuseIPDB](#) · [VirusTotal](#) · [OTX](#)

- Automated IP reputation queries and alert enrichment to accelerate SOC triage; reports via Telegram

Raspberry Pi – DNS Security & Automation

- Pi-hole for DNS content filtering and malicious domain blocking; Bash scripts for automated log management

EDUCATION

DEC – Computer Science Technology (Cybersecurity & Networking)

2021 – 2025

Collège Bois-de-Boulogne, Montreal, QC

TECHNICAL SKILLS

Security / SOC	Splunk, Wazuh, ELK · Suricata, Snort · Wireshark, tcpdump · Nessus, OpenVAS · Pi-hole DNS filtering · Sysmon, Windows Event Logs, journald · MITRE ATT&CK · Alert triage & false positive reduction
Networking	TCP/IP, VLAN, Trunking, OSPF, BGP, VPN, DHCP, DNS, NAT, Cisco IOS (ACL, Routing, Switching)
Systems	Linux: Arch (daily), Debian, Ubuntu, CentOS · Windows Server: AD, GPO, DNS, DHCP · VMware, Hyper-V, VirtualBox
Scripting	Python, Bash, PowerShell
Languages	French (fluent) · English (fluent) · Arabic (native)
